YUKON SPATIAL PRICE SURVEY

JUNE 1984

Whitehorse - Edmon
Whitehorse - Vancou

FOREWORD

The following report is presented as a summary to the June 1984 spatial price survey between Whitehorse and the cities of Vancouver and Edmonton. This survey was made possible by the assistance and co-operation of the business communities of Whitehorse, Vancouver and Edmonton. The Economic Research and Planning Branch would also like to acknowledge the assistance provided by the Consumer's Association of Canada in each of the three cities.

PREAMBLE

A spatial price survey is designed to compare the prices of consumer goods and services in one geographic centre with those in another. Prices for identical and directly comparable items are collected and combined to form price indexes. The price indexes are aggregated according to their relative importance to household expenditures. The resultant index reflects both consumption and price.

The Yukon Spatial Price Survey is similar to the price surveys undertaken by Statistics Canada but is more comprehensive. The Yukon survey adheres to pure price comparison theory; accordingly, only identical items and quantities consumed are compared. The alternative, or cost of living approach, permits differing consumption in each geographic centre - quantities consumed may vary because of social, economic, geographic or environmental influences. This alternative, although conceptually preferable, is not operationally feasible nor does it permit direct statements of price levels.

HIGHLIGHTS

The following highlights incorporate price comparisons between the City of Whitehorse and two southern regional centres: Vancouver and Edmonton. Results for the Whitehorse - Edmonton survey include 8,202 price quotes for 1,490 identical consumer goods and services. Price comparisons between Whitehorse and Vancouver reflect 7,883 individual prices for 1,371 identical commodities. All items surveyed cover 90.24 percent of the goods in seven major components of consumer spending: food, housing, clothing, transportation, health and personal care, recreation, reading and education, and tobacco and alcohol.

1.0 SPATIAL PRICE INDEX, EDMONTON - WHITEHORSE

	Weight	Index
	(%)	(Edmonton = 100)
All Items	90.24	124.6
Food	19.22	131.3
Food for home consumption	13.47	127.6
Meat, poultry and fish	3.92	117.3

Tobacco	1.52	107.2
Alcohol	4.48	128.8

WHITEHORSE - EDMONTON COMPARISON

All Items: Average retail prices (124.6) for June 1984 were 24.6 percent higher in Whitehorse than Edmonton:

- overall prices were greatly influenced by the high prices for food (131.3), housing (130.8) and transportation (120.6);
- prices for tobacco and alcohol (123.3) were 23.3 percent higher; although high price differences were experienced in this component its low weight dampened its impact on the all items index;
- clothing (117.2) was 17.2 percent and health and personal care (115.2) was 15.2 percent higher in Whitehorse; and
- the component recording lowest price differences from Edmonton was recreation, reading and education (112.7), 12.7 percent higher in Whitehorse.

Food: Prices for food (131.3) were 31.3 percent higher in Whitehorse than Edmonton:

- food prices for home consumption (127.6) were 27.6 percent higher than Edmonton prices; in 1983 food prices for home consumption were 25.9 percent higher than Edmonton prices;
- highest price differences were experienced in perishable items such as dairy products (126.6), fresh fruit (128.8), fresh vegetables (149.3) and cereal and bakery products (140.6);
- at the specific product level, frequently purchased staples appeared to be the highest priced commodities relative to Edmonton--whole milk (137.9), flour (124.3), sugar (146.6) and bakery products (149.2), carrots (153.5), lettuce (159.2) and potatoes (186.9), oranges (138.0) and bananas (141.5); and
- prices for food away from home (140.0) were 40.0 percent higher in Whitehorse.

Housing: Overall, retail prices for housing (130.8) excluding mortgage payments, were 30.8 percent higher in Whitehorse than Edmonton:

- household operation was the major contributor to high price indexes in housing with price levels 76.1 percent higher than Edmonton. Within household operation the prices of water, fuel and electricity strongly impacted on price levels with values 24.9, 277.6 and 38.3 percent higher respectively than those of Edmonton; and
- price levels associated with household furnishings (115.4) were 15.4 percent higher in Whitehorse.

Clothing: Overall retail prices for clothing (117.2) were 17.2 percent higher in Whitehorse:

- women's wear (118.6) was 18.6 percent higher than Edmonton;
- men's wear (106.2) was comparable in price levels;
- number of available price comparisons made the value for children's wear less reliable (girls' wear - 113.8, boys' wear - 118.7, infant wear - 114.6); and
- clothing material price levels were decisively higher at 51.8 percent above prices in Edmonton.

Transportation: Price levels of transportation (120.6) were 20.6 percent greater in Whitehorse than Edmonton:

- the single largest influence in terms of price relatives and consumption weights in private transportation were those of auto and truck operation (126.5) at 26.5 percent higher than those of Edmonton; and
- public transportation (158.3) registered values 58.3 percent higher than Edmonton; and
- car rentals were 238.1 percent higher in Whitehorse than Edmonton.

Health and Personal Care: Health and personal care goods and services (115.2) were on average 15.2 percent higher in Whitehorse than Edmonton:

- health care (115.3) was the highest sub-component at 15.3 percent higher than Edmonton. The most influential item was eye care (141.5).

Recreation, Reading & Education: Price levels in this component (112.7) were 12.7 percent higher than Edmonton:

- in recreation the highest price differences were in home entertainment at 19.7 percent higher than Edmonton.

Tobacco & Alcohol: Retail prices for tobacco and alcohol products (123.3) were 23.3 percent higher than Edmonton:

- tobacco products (107.2) were 7.2 percent more expensive in Whitehorse; and
- alcohol (128.8) was 28.8 percent higher with large price relatives exhibited by beer and wine prices purchased in government liquor stores - 32.3 and 44.7 percent higher respectively.

2.0 SPATIAL PRICE INDEX, VANCOUVER - WHITEHORSE

WHITEHORSE - VANCOUVER COMPARISON

All Items: Price levels (113.8) were 13.1 percent higher overall in Whitehorse than in Vancouver:

- prices for housing (117.1) and food (119.3) contributed greatest to the all items index;
- health and personal care prices (116.7) were 16.7 percent higher in Whitehorse than Vancouver;
- retail prices for the components clothing (113.7) and recreation, reading and education (113.5) were 13.7 and 13.5 percent higher respectively in Whitehorse than in Vancouver; and
- in the Vancouver and Whitehorse comparison, lowest price differences were exhibited in values for transportation (103.9) and tobacco and alcohol (100.5), a result related to low tobacco prices.

Food: Prices for food (119.3) were 19.3 percent higher in Whitehorse than in Vancouver:

- food for home consumption was on average 23.8 percent higher in Whitehorse than Vancouver;
- highest price levels were experienced in fresh fruit (140.3) at 40.3 percent higher than Vancouver and fresh vegetables (165.3), a substantial 65.3 percent higher;
- items exhibiting highest price indexes were: pork (122.6), ground beef (133.3), bakery products (126.8), bananas (145.7) and apples (140.2), cabbage (183.0), lettuce (188.3) and potatoes (192.7), sugar (147.5) and soft drinks (161.8); and
- price levels for restaurant meals (108.6) were on average 8.6 percent higher in Whitehorse than Vancouver.

Housing: Overall price levels for housing (117.1) were 17.1 percent higher in Whitehorse than Vancouver (excluding mortgage payments):

- prices associated with rental (94.8) and owned (105.6) accommodation were comparable in Whitehorse and Vancouver largely as a result of lower apartment rental values and lower property taxes; and
- price levels for household operation (151.3) were the highest indexes, 51.3 percent higher than Vancouver. This situation is a product of the higher costs of water (325.0), and fuel (264.5).

Clothing: Retail prices for clothing items (113.7) were 13.7 percent higher in Whitehorse than Vancouver:

- women's wear (116.6) was 16.6 percent higher than Vancouver;
- men's and boys' clothing were comparable to Vancouver prices; and
- clothing material was 52.6 percent higher in Whitehorse than Vancouver.

Transportation: Overall price levels associated with transportation in Whitehorse (103.9) were 3.9 percent higher than Vancouver:

- auto and truck purchases were comparable in Whitehorse and Vancouver; prices for auto and truck operation (104.6) were 4.6 percent higher;
- price levels for Whitehorse public transportation were 36.6 percent above those of Vancouver; and
- vehicle rentals were 137.8 percent higher in Whitehorse than in Vancouver.

Health & Personal Care: Prices for health and personal care (116.7) were 16.7 percent higher than in Vancouver:

- health care (128.5) exhibited price levels 28.5 percent higher than those of Vancouver. Dental (140.5) and eye care (134.6) showed the greatest price differences; and
- personal care items (109.4) were 9.4 percent higher than Vancouver prices.

Recreation, Reading and Education: On average, prices in this component (113.5) were 13.5 percent higher than Vancouver:

- the major influence on prices was the higher prices for home entertainment (118.2) and especially cablevision (176.7) at 76.7 percent higher than Vancouver.

Tobacco & Alcohol: Retail prices for tobacco and alcohol (100.5) were similar, only 0.5 percent difference in prices:

- tobacco products (75.2) were 24.8 percent lower in Whitehorse; and
- alcohol (109.0) was 9.0 percent higher with the greatest differences exhibited by the price of beer and wine purchased in government liquor stores and wine purchased on licenced premises.

SOURCE: Yukon Price Survey

NOTES ON TEMPORAL SHIFT

A temporal shift in spatial price indexes will occur when rates of growth in retail prices between cities vary over time. This situation was demonstrated for Whitehorse and Edmonton, and Whitehorse and Vancouver between June 1983 and June 1984.

a) Edmonton: The overall price gap between Whitehorse and Edmonton widened marginally between June 1983 and June 1984. Survey results also indicate higher rates of growth in prices in Whitehorse when compared to Edmonton, a trend supported by the Consumer Price Index carried out by Statistics Canada;
   - prices for food for home consumption increased in relative terms from 28.3 in 1983 to 31.3 percent higher in 1984 in Whitehorse than Edmonton. This could indicate a relative rate of growth in Edmonton that is less than that experienced in Whitehorse for food;
   - price levels grew more rapidly in Whitehorse than Edmonton in all major areas with the exception of recreation, reading and education.

b) Vancouver: The overall price difference between Whitehorse and Vancouver decreased between 1983 and 1984 suggesting growth rates that are lower for Whitehorse than Vancouver:
   - spatial price levels in Whitehorse when compared to Vancouver for food, housing, transportation, recreation, reading and education, and tobacco and alcohol were lower in percentage terms from 1983 to 1984;
   - clothing and health and personal care experienced a higher rate of growth in Whitehorse than in Vancouver portrayed by the widening of the gap between these spatial price indexes.

APPENDIX B

DEFINITIONS

DEFINITIONS

Price:

- represents the prevailing prices for retail goods or services;
- regular sales prices available to all consumers were used - the only exceptions include sales items brought in specifically for a clearance sale which are not normally available to the consumer on a continual basis.

Index:

- is a ratio of one price to another (for presentation, the index has been multiplied by 100). In this survey all indexes refer to the comparison of Whitehorse prices with those of the base cities Edmonton and Vancouver;
- all price comparisons were calculated using only identical matches (i.e. only identical brands and model numbers represent valid item comparisons).

Weight:

- represents the relative importance of an item to a household's annual expenditure on consumer goods and services. This weight is expressed as a percentage and can be interpreted as a percentage of a household's disposable income spent on any given item or collection of items.

APPENDIX D

COMMODITY PRICE RELATIVES

COMMODITY PRICE RELATIVES

Report 1 of this appendix includes item by item price relatives for Whitehorse-Edmonton and Whitehorse-Vancouver. These detailed commodity price relatives represent the spatial price differentials observed during the first week of June, 1984.

An extensive and accurate check of all price quotes has been applied and the methodology used adheres to the highest professional standards. The user must recognize that at the individual item level relatives may exhibit a certain degree of statistical volatility - specifically, given the exhaustive list of items covered, sale prices, product availability and retail outlet selection could influence a given commodity comparison. As one aggregates commodity to group, group to higher category and subsequently to component level the price relatives become increasingly stable and representative (i.e. Just as an average of 10 prices is more representative than a single price quote, an average of 10 commodity relatives is more representative than a single relative. A single relative however is already a composite of a number of single price quotes).

Report 2 of this appendix provides the user with the number of comparisons and the number of price quotes within these comparisons. An item price relative is a composite of these comparisons.
